

Introducing the Business Law Guide – a powerful new legal risk management tool

We're delighted to announce the addition of the Business Law Guide to the Business Risk Protection and Farm Risk Protection service.

Developed to compliment the existing legal document service, the Law Guide includes detailed articles covering a range of legal compliance subjects, from employment law and intellectual property rights to landlord and tenant regulations.

Now, through the Law Guide, business customers will be able to read up on the legalities of issues such as:

- ◆ Terminating an Employee
- ◆ Hiring employees
- ◆ Employment policies and procedures (including discipline)
- ◆ Chasing payments
- ◆ Website privacy and cookie notices
- ◆ Running events
- ◆ Starting a business
- ◆ Commercial and residential letting
- ◆ Intellectual property and non-disclosure agreements

Written in plain English by legal experts, the Law Guide articles relate to the legal documents provided, so customers can get a more in-depth understanding of the legal issues they face and how to manage them.

Accessing the Law Guide

The Law Guide is now an integral part of the legal document service. Once logged into Business Risk Protection or Farm Risk Protection, you can easily access the Law Guide from a tab on the top navigation bar.

The addition of the Law Guide is part of our commitment to ensuring policyholders are empowered with the knowledge and tools they need to avoid legal disputes, protect their interests, and thrive.

Farmowner policyholders
